FORM 10-Q
UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D. C. 20549
[X] QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended June 30, 2000
or
[ ] TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from $\qquad$ to $\qquad$
For Quarter Ended June 30, 2000 Commission File Number: 1-10394

CVB FINANCIAL CORP.
(Exact name of registrant as specified in its charter)

California
(State or other jurisdiction of incorporation or organization)

701 North Haven Ave, Suite 350, Ontario, California (Address of Principal Executive Offices)
(Registrant's telephone number, including area code)

95-3629339
(I.R.S. Employer Identification No.)

91764
(Zip Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by section 13 or $15(\mathrm{~d})$ of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES X NO
Number of shares of common stock of the registrant: $25,125,509$ outstanding as of June 30, 2000.

This Form 10-Q contains 30 pages. Exhibit index on page 28.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended June 30, 2000 and 1999

1. Summary of Significant Accounting Policies. See Note 1 of the Notes to Consolidated Financial Statements in CVB Financial Corp.'s 1999 Annual Report on Form 10-K.

Goodwill resulting from purchase accounting treatment of acquired banks is amortized on a straight- line basis over 15 years.

The Bank accounts for impaired loans in accordance with Statement of Financial Accounting Standards ("SFAS") No. 114, "Accounting by Creditors for Impairment of a Loan," as amended by SFAS No. 118, "Accounting by Creditors for Impairment of a Loan -- Income Recognition and Disclosures." Impaired loans totaled $\$ 2.7$ million at June 30, 2000. These loans were supported by collateral with a fair market value, net of prior liens, of $\$ 3.4$ million.
2. Certain reclassifications have been made in the 1999 financial information to conform to the presentation used in 2000.
3. In the ordinary course of business, the Company enters into commitments to extend credit to its customers. These commitments are not reflected in the accompanying consolidated financial statements. As of June 30, 2000, the Company had entered into commitments with certain customers amounting to $\$ 344.7$ million compared to $\$ 250.8$ million at December 31, 1999. Letters of credit at June 30, 2000, and December 31, 1999, were $\$ 15.6$ million and $\$ 13.3$ million, respectively.
4. The interim consolidated financial statements are unaudited and reflect all adjustments and reclassifications which, in the opinion of management, are necessary for a fair statement of the results of operations and financial condition for the interim period. All adjustments and reclassifications are of a normal and recurring nature. Results for the period ending June 30, 2000 are not necessarily indicative of results which may be expected for any other interim period or for the year as a whole.
5. The actual number of shares outstanding at June 30, 2000 was 25, 125,509. Basic earnings per share are calculated on the basis of the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated on the basis of the weighted average number of shares outstanding during the period plus shares issuable upon the assumed exercise of outstanding common stock options. All 1999 per share information in the financial statements and in Management's Discussion and Analysis has been restated to give retroactive effect to the 5-for-4 stock split declared December 15, 1999 and which was effective on January 14, 2000. The table below presents the reconciliation of earnings per share for the periods indicated.

Earnings Per Share Reconciliation
(Dollars and shares in thousands, except per share amounts)

> For the Three Months
> Ended June 30,

| 2000 |  |  | 1999 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Income (Numerator) | Weighted Average Shares (Denominator) | Per Share Amount |  | Income (Numerator) | Weighted Average Shares (Denominator) | Per Share Amount |
| \$ 8,447 | 25,070 | \$0.34 | \$ | 7,025 | 24,456 | \$0. 29 |
|  | 518 | (0.01) |  |  | 958 | (0.01) |
| \$ 8,447 | 25,588 | \$0.33 | \$ | 7,025 | 25,414 | \$0. 28 |

6. Supplemental Cash Flow Information - During the six-month period ended June 30, 1999, loans amounting to $\$ 1.8$ million were transferred to Other Real Estate Owned ("OREO") as a result of foreclosure on the real properties held as collateral. No loans were transferred to OREO during the six-month period ended June 30, 2000.

CVB FINANCIAL CORP. AND SUBSIDIARIES
MANAGEMENT'S DISCUSSION AND ANALYSIS
Management's discussion and analysis is written to provide greater insight into the results of operations and the financial condition of CVB Financial Corp. and its subsidiaries. Throughout this discussion, "Company" refers to CVB Financial Corp. and its subsidiaries as a consolidated entity. "CVB" refers to CVB Financial Corp. as the unconsolidated parent company and "Bank" refers to Citizens Business Bank. For a more complete understanding of CVB Financial Corp. and its operations, reference should be made to the financial statements included in this report and in the Company's 1999 Annual Report on Form 10-K. Certain statements in this Report on Form 10-Q constitute "forward-looking statements" under the Private Securities Litigation Reform Act of 1995 which involve risks and uncertainties. The Company's actual results may differ significantly from the results discussed in such forward-looking statements. Factors that might cause such a difference include, but are not limited to, economic conditions, competition in the geographic and business areas in which the Company conducts operations, fluctuations in interest rates, credit quality, year 2000 data systems compliance, and government regulations. For additional information concerning these factors, see "Item 1. Business Factors That May Affect Results" contained in the Company's Annual Report on Form 10-K for the year ended December 31, 1999.

## RESULTS OF OPERATIONS

The Company reported net earnings of $\$ 16.3$ million for the six months ended June 30, 2000. This represented an increase of $\$ 3.0$ million, or $22.67 \%$, over net earnings of \$13.3 million, for the six months ended June 30, 1999. Basic earnings per share for the six month period increased to $\$ 0.65$ per share for 2000, compared to $\$ 0.54$ per share for 1999. Diluted earnings per share increased to $\$ 0.64$ per share for the first six months of 2000 , compared to $\$ 0.52$ per share for the same six month period last year. The annualized return on average assets was $1.61 \%$ for the first six months of 2000 compared to a return on average assets of $1.46 \%$ for the six months ended June 30, 1999. The annualized return on average equity was $21.85 \%$ for the six months ended June 30, 2000, compared to a return of $18.44 \%$ for the six months ended June 30, 1999.

For the quarter ended June 30, 2000, the Company generated net earnings of $\$ 8.4$ million. This represented an increase of $\$ 1.4$ million, or $20.25 \%$, over net earnings of $\$ 6.3$ million for the second quarter of 1999. Basic earnings per share increased to $\$ 0.34$ for the second quarter of 2000 compared to $\$ 0.29$ per share for the second quarter of 1999. Diluted earnings per share increased to $\$ 0.33$ per share compared to $\$ 0.28$ per share for the second quarter of 2000 and 1999, respectively. The annualized return on average assets was $1.65 \%$ for the second quarter of 2000 compared to $1.54 \%$ for the same period last year. The annualized return on average equity was $22.41 \%$ for the second quarter of 2000 and $19.34 \%$ for the second quarter of 1999.

Pre-tax operating earnings, which exclude the impact of gains or losses on sale of securities and OREO, and the provisions for credit and OREO losses, totaled $\$ 27.5$ million for the six months ended June 30, 2000. This represented an increase of $\$ 5.4$ million, or $24.33 \%$, compared to pre-tax operating earnings of $\$ 22.1$ million for the first six months of 1999 . For the second quarter of 2000, pre-tax operating earnings totaled $\$ 14.1$ million. This represented an increase of $\$ 2.7$ million, or $23.49 \%$, from pre-tax operating earnings of $\$ 11.4$ million for the second quarter of 1999.

The principal component of the Company's earnings is net interest income, which is the difference between the interest and fees earned on loans and investments and the interest paid on deposits and other borrowed funds. When net interest income is expressed as a percentage of average earning assets, the result is the net interest margin. The net interest spread is the yield on average earning assets minus the average cost of interest-bearing deposits and borrowed funds. The Company's net interest income, interest spread, and net interest margin are sensitive to general business and economic conditions. These conditions include short-term and long-term interest rates, inflation, monetary supply, and the strength of the economy, in general, and the local economics in which the Company conducts business.

For the six months ended June 30, 2000, net interest income was $\$ 46.7$ million. This represented an increase of $\$ 3.3$ million, or $7.56 \%$, over net interest income of $\$ 43.5$ million for the six months ended June 30, 1999. Although net interest income increased, the net interest margin decreased to 5.27\% for the six months ended June 30, 2000, compared to $5.33 \%$ for the six months ended June 30, 1999. Also, the net interest spread decreased to $3.85 \%$ for the six months ended June 30, 2000, compared to a spread of $4.10 \%$ for the six months ended June 30, 1999. The increase in net interest income for the most recent six month period was primarily the result of an increased volume of average earning assets and an increase in the yield on earning assets. Gross earning assets averaged $\$ 1.9$ billion for the first six months of 2000. This represented an increase of $\$ 191.7$ million, or $11.48 \%$, compared to average earning assets of $\$ 1.7$ billion for the first six months of 1999 . The decrease in net interest spread from $4.10 \%$ for the six months ended June 30, 1999 to $3.85 \%$ for the six months ended June 30, 2000 was the result of interest earning assets increasing 50 basis points, while interest bearing liabilities increased 75 basis points.

The cost of interest bearing liabilities was $4.17 \%$ for the first six months of 2000 compared to $3.42 \%$ for the same period last year, an increase of 75 basis points. The yield on earning assets was $8.02 \%$ for the first six months of 2000 compared to $7.52 \%$ for the same period last year, an increase of 50 basis points.

For the second quarter of 2000, net interest income was $\$ 23.5$ million. This represented an increase of $\$ 1.5$ million, or $6.68 \%$, compared to $\$ 22.1$ million for the second quarter of 1999. The net interest margin was $5.22 \%$ during the second quarter of 2000 compared to $5.39 \%$ for the same period last year. The net interest spread was $3.79 \%$ during the second quarter of 2000 compared to 4.17\% for the second quarter of 1999. The decrease in the net interest margin and net interest spread resulted as the yield on average earning assets increased less than the increase in the cost of interest-bearing liabilities.

The Company reported total interest income of $\$ 72.6$ million for the six months ended June 30, 2000. This represented an increase of $\$ 10.9$ million, or $17.63 \%$, over total interest income of $\$ 61.8$ million for the six months ended June 30, 1999. The increase reflected the greater volume of earning assets and an increase in yield noted above.

The increase in the yield on average earning assets resulted from higher yields on average loans and investments. The yield on average loans increased to $9.09 \%$ for the six months ended June 30, 2000, from a yield of $8.91 \%$ for the first six months of 1999. The yield (FTE) on average investments increased to $6.90 \%$ for the first six months of 2000, from a yield (FTE) of $6.18 \%$ for the first six months of 1999. Loans typically generate higher yields than investments. Accordingly, the higher the loan portfolio is as a percentage of earning assets, the higher the yield on earning assets. For the six months ended June 30, 2000, average loans represented $51.23 \%$ of average earning assets, compared to $50.66 \%$ for the six months ended June 30, 1999.

The interest expense for the six months ended June 30, 2000 increased when compared to the same periods for 1999. Interest expense totaled $\$ 25.9$ million for the six months ended June 30, 2000. This represented an increase of $\$ 7.6$ million, or $41.55 \%$, over total interest expense of $\$ 18.3$ million for the six months ended June 30, 1999.

The increase in interest expense reflected an increase in the average volume of interest-bearing liabilities and an increase in the cost of funds. Average interest-bearing liabilities were $\$ 1.2$ billion for the first six months of 2000. This represented an increase of $\$ 172.9$ million, or $16.16 \%$, from average interest-bearing liabilities of $\$ 1.1$ billion for the first six months of 1999.

For the three months ended June 30, 2000, interest expense totaled $\$ 13.8$ million. This represented an increase of $\$ 4.8$ million, or $52.91 \%$ over interest expense of $\$ 9.0$ million for the same period last year. The increase in interest expense reflected an increase in the cost of funds.

Average interest-bearing deposits totaled $\$ 855.3$ million for the six months ended June 30, 2000. This represented an increase of $\$ 6.2$ million, or $0.73 \%$, over average interest-bearing deposits of $\$ 849.0$ million for the six months ended June 30, 1999.

Other borrowed funds averaged $\$ 375.4$ million for the six months ended June 30, 2000. This represented an increase of $\$ 160.9$ million, or $75.03 \%$, over average other borrowed funds of $\$ 214.5$ million for the six months ended June 30, 1999.

Average interest-bearing deposits totaled $\$ 859.2$ million for the three months ended June 30, 2000. This represented a decrease of $\$ 1.3$ million, or $0.15 \%$, over average interest-bearing deposits of $\$ 860.5$ million for the three months ended June 30, 1999.

Other borrowed funds averaged $\$ 397.9$ million for the three months ended June 30, 2000. This represented an increase of $\$ 196.5$ million, or $97.52 \%$, over average other borrowed funds of $\$ 201.5$ million for the three months ended June 30, 1999.

The cost of average interest-bearing liabilities increased to $4.17 \%$ for the six months ended June 30, 2000, compared to a cost of $3.42 \%$ for the first six months of 1999. The increase in the cost of interest-bearing liabilities was primarily the result of an increase in the interest rate environment. The cost of average interest bearing deposits was $3.36 \%$ for the first six months of 2000 as compared to $2.96 \%$ for the first six months of 1999. The cost of other borrowed funds increased to $5.94 \%$ for the six months ended June 30, 2000, compared to a cost of $5.20 \%$ for the six months ended June 30, 1999.

A higher interest rate environment would increase the Company's cost to borrow funds and increase the rate paid on deposits, which more than offset, in the net interest margin and interest spread, the increase in rates earned by the Company on new or floating rate loans or investments.

Table 1 shows the average balances of assets, liabilities, and stockholders' equity and the related interest income, expense, and rates for the six month periods ended June 30, 2000, and 1999. Rates for tax-preferenced investments are shown on a taxable equivalent basis using a $40.3 \%$ tax rate.

(1) Yields are calculated on a taxable equivalent basis.
(2) Loan fees are included in total interest income as follows: 2000, \$1,879; 1999, \$1,637.
(3) Nonperforming loans are included in loans as follows: 2000, \$1,022; 1999, $\$ 6,095$.
(4) Includes interest-bearing demand and money market accounts.

Table 2 summarizes the changes in interest income and interest expense based on changes in average asset and liability balances (volume) and changes in average rates (rate). For each category of interest earning assets and interest-bearing liabilities, information is provided with respect to changes attributable to (1) changes in volume (change in volume multiplied by initial rate), (2) changes in rate (change in rate multiplied by initial volume) and (3) changes in rate/volume (change in rate multiplied by change in volume).

TABLE 2 - Rate and Volume Analysis for Changes in Interest Income, Interest Expense and Net Interest Income
(amounts in thousands)

| Interest Expense: |  |  |  |  |  |  |  |  |
| Savings deposits |  | (37) |  | 939 |  | (7) |  | 895 |
| Time deposits |  | 226 |  | 688 |  | 21 |  | 935 |
| Other borrowings |  | 4,331 |  | 823 |  | 620 |  | 5,774 |
| Total interest-bearing liabilities |  | 4,520 |  | 2,450 |  | 634 |  | 7,604 |
| Net Interest Income | \$ | 2,603 | \$ | 1,286 | \$ | (604) | \$ | 3,285 |

During periods of changing interest rates, the ability to reprice interest earning assets and interest-bearing liabilities can influence net interest income, net interest margin, and, consequently, the Company's earnings. Interest rate risk is managed by attempting to control the spread between rates earned on interest-earning assets and the rates paid on interest-bearing liabilities within the constraints imposed by market competition in the Bank's service area. Short term repricing risk is minimized by controlling the level of floating rate loans and maintaining investment payments and maturities which are scheduled in approximately equal increments over time. Basis risk is managed by the timing and magnitude of changes to interest-bearing deposits rates. Yield curve risk is reduced by keeping the duration of the loan and investment portfolios relatively short. Options risk in the investment portfolio is monitored monthly and actions are recommended when appropriate.

13

Both the net interest spread and the net interest margin are largely affected by interest rate changes in the market place and the Company's ability to reprice assets and liabilities as these interest rates change. The Company's management utilizes the results of a dynamic simulation model to quantify the estimated exposure of net interest income to sustained changes in interest rates. The sensitivity of the Company's net interest income is measured over a rolling two year horizon. The simulation model estimates the impact of changing interest rates on the net interest income from all interest earning assets and interest expense paid on all interest bearing liabilities reflected on the Company's balance sheet. The sensitivity analysis is compared to policy limits which specify a maximum tolerance level for net interest income exposure over a one year time horizon assuming no balance sheet growth, given both a 200 basis point upward and downward shift in interest rates. A parallel and pro rata shift in interest rates over a 12 month period is assumed. The following reflects the Company's net interest income sensitivity over a one year horizon as of June 30, 2000.

Estimated Net
Interest Income
Sensitivity

Simulated
+200 basis points

- -200 basis points

## (2.26\%)

4.05\%

The table indicates that net interest income would decrease by approximately $2.26 \%$ over a 12 month period if there was a sustained, parallel and pro rata 200 basis point upward shift in interest rates. Net interest income would increase approximately $4.05 \%$ over a 12 month period if there was a sustained, parallel and pro rata 200 basis point downward shift in interest rates. The ability to reprice assets and liabilities as interest rates change is effected by the mix between fixed rate and floating rate assets and liabilities. In addition, the maturity schedule of fixed rate assets and liabilities also impacts the ability to reprice.

Credit Loss Experience
The allowance for credit losses is based upon estimates of probable losses inherent in the loan and lease portfolio. The amount of credit losses actually incurred can vary significantly from the estimated amounts. The Company's methodology includes several features which are intended to reduce the differences between estimated and actual losses.

Implicit in lending activities is the risk that losses will occur and that the amount of such losses will vary over time. Consequently, the Company maintains an allowance for credit losses by charging a provision for credit losses to earnings. Loans determined to be losses are charged against the allowance for credit losses. The Company's allowance for credit losses is maintained at a level considered by the Bank's management to be adequate to provide for estimated losses inherent in the existing portfolio, including commitments under commercial and standby letters of credit.

The Company's methodology for assessing the appropriateness of the allowance consists of several key elements, which include the formula allowance, specific allowances for identified problem loans and portfolio segments, and the unallocated allowance. In addition, the allowance incorporates the results of measuring impaired loans as provided in Statement of Financial Accounting Standards ("SFAS") No. 114, "Accounting by Creditors for Impairment of a Loan" and SFAS No. 118, "Accounting by Creditors for Impairment of a Loan - Income Recognition and Disclosures." These accounting standards prescribe the measurement methods, income recognition and disclosures related to impaired loans.

Specific allowances are established in cases where management has identified significant conditions or circumstances related to a credit that management believes indicates the probability that a loss has been incurred in excess of the amount determined by the application of the formula allowance.

Management performs a detailed analysis of these loans, including, but not limited to, appraisals of the collateral, conditions of the marketplace for liquidating the collateral and assessment of the guarantors. Management then determines the loss potential and allocates a portion of the allowance for losses as a specific allowance for each of these credits.

The unallocated allowance is based upon management's evaluation of various conditions, the effects of which are not directly measured in the determination of the formula and specific allowances. The evaluation of the inherent loss with respect to these conditions is subject to a higher degree of uncertainty because they are not identified with specific problem credits or portfolio segments. The conditions evaluated in connection with the unallocated allowance include the following conditions that existed as of the balance sheet date:
o then-existing general economic and business conditions affecting the key lending areas of the Company,
o then-existing economic and business conditions of areas outside the lending areas, such as other sections of the United States, Asia and Latin America,
credit quality trends (including trends in non-performing loans expected to result from existing conditions),
collateral values,
loan volumes and concentrations,
seasoning of the loan portfolio,
specific industry conditions within portfolio segments,
recent loss experience in particular segments of the portfolio,
duration of the current business cycle,
bank regulatory examination results, and
findings of the Company's internal credit examiners.
Management reviews these conditions in discussion with the Company's senior credit officers. To the extent that any of these conditions is evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation date, management's estimate of the effect of such condition may be reflected as a specific allowance applicable to such credit or portfolio segment. Where any of these conditions is not evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation date, management's evaluation of the probable loss related to such condition is reflected in the unallocated allowance.

The Company maintains an allowance for potential credit losses that is increased by a provision for credit losses charged against operating results. The allowance for credit losses is also increased by recoveries on loans previously charged off and reduced by actual loan losses charged to the allowance. The provision for credit losses was $\$ 1.6$ million for the six months ended June 30, 2000, as compared to $\$ 1.2$ million for the same period of 1999 , an increase of $\$ 410,000$, or $34.45 \%$.

The allowance for credit losses at June 30, 2000 was $\$ 18.2$ million. This represented an increase of $\$ 2.2$ million, or $13.72 \%$, from the allowance for credit losses of $\$ 16.0$ million at June 30, 1999. The allowance for credit losses was 1.91\% of average gross loans for the first six months of 2000 and $1.89 \%$ of average gross loans for the first six months of 1999. For the six months ended June 30, 2000, net loan charge offs totaled $\$ 174,000$, compared to net loan charge offs of $\$ 53,000$ for the first six months of 1999.

Non-performing loans, which include non-accrual loans, loans past due 90 or more days and still accruing, and restructured loans were $\$ 1.0$ million at June 30, 2000. This represented a decrease of $\$ 172,000$, or $14.41 \%$, from the level of non-performing loans at December 31, 1999. Non-performing assets, which include non-performing loans plus other real estate owned (foreclosed property) totaled $\$ 1.5$ million at June 30, 2000. This represented a decrease of $\$ 356,000$, or 18.77\%, from non-performing assets of $\$ 1.9$ million at December 31, 1999. Table 6 presents non-performing assets as of June 30, 2000, and December 31, 1999. The Company applies the methods prescribed by Statement of Financial Accounting Standards No. 114 for determining the fair value of specific loans for which the eventual collection of all principal and interest is considered impaired.

While management believes that the allowance at June 30, 2000 was adequate to absorb losses from any known or inherent risks in the portfolio, no assurance can be given that economic conditions which adversely affect the Company's service areas or other circumstances will not be reflected in increased provisions or credit losses in the future. Table 3 shows comparative information on net credit losses, provisions for credit losses, and the allowance for credit losses for the periods indicated.

| $1.91 \%$ | $0.66 \%$ |
| $10.88 \%$ | $4.45 \%$ |

Other operating income includes revenues earned from sources other than interest income. These sources include: service charges and fees on deposit accounts, fee income from the Asset Management Division, other fee oriented products and services, gain or loss on sale of securities or other real estate owned, and gross revenue from Community Trust Deed Services (the Company's nonbank subsidiary).

Other operating income totaled $\$ 9.1$ million for the six months ended June 30, 2000. This represented a decrease of $\$ 600,000$, or $5.50 \%$, from other operating income of $\$ 9.7$ million for the six months ended June 30, 1999. The decrease was primarily the result of lower other fees and charges, increased loss on the sale of securities, lower gain on the sale of other real estate owned, and lower service charges. For the three months ended June 30, 2000, other operating income totaled $\$ 4.4$ million, a decrease of $\$ 800,000$, or $14.36 \%$, from $\$ 5.2$ million for the same three month period ended June 30, 1999. The decrease was primarily the result of lower service charge income, lower other fees and charges, and lower gain on the sale of other real estate owned.

Service charge income totaled $\$ 5.2$ million for the first six months ended June 30, 2000. This represents a decrease of $\$ 48,000$, or $0.92 \%$, over service charge income of \$5.2 million for the six months ended June 30, 1999. For the three months ended June 30, 1999, service charge income totaled \$2.6 million, a decrease of $\$ 179,000$, or $6.55 \%$, from $\$ 2.7$ million for the same three month period ended June 30, 1999.

Trust income totaled $\$ 2.0$ million for the six months ended June 30, 2000. This represented an increase of $\$ 86,000$, or $4.45 \%$, over trust income of $\$ 1.9$ million for the six months ended June 30, 1999. For the three months ended June 30, 2000, trust income totaled $\$ 969,000$, an increase of $\$ 75,000$, or $8.44 \%$, from \$894,000 for the same three month period ended June 30, 1999.

Other fees and charges totaled $\$ 3.9$ million for the first six months ended June 30, 2000. This represents a decrease of $\$ 229,000$ or $5.60 \%$, over other fees and charges of $\$ 4.1$ million for the six months ended June 30, 1999. For the three months ended June 30, 2000, other fees and charges totaled $\$ 1.9$ million, a decrease of $\$ 160,000$, or $7.61 \%$, from $\$ 2.1$ million for the same three month period ended June 30, 1999.

Gain on the sale of other real estate owned totaled \$223,000 for the six months ended June 30, 2000. This represents a decrease of $\$ 125,000$ or $35.78 \%$, over the gain on the sale of other real estate owned of $\$ 348,000$ for the six months ended June 30, 1999. For the three months ending June 30, 2000, there was no gain/loss on the sale of other real estate owned. For the three months ending June 30, 1999, the gain on the sale of other real estate owned totaled $\$ 348$, 000.

Other operating expenses totaled $\$ 28.3$ million for the six months ended June 30, 2000. This represented a decrease of $\$ 2.5$ million, or $8.12 \%$, over other operating expenses of $\$ 30.8$ million for the six months ended June 30, 1999. For the three months ended June 30, 2000, other operating expenses totaled $\$ 13.9$ million. This compares with $\$ 15.6$ million for the same period last year, a decrease of $\$ 1.7$ million, or $10.69 \%$.

Salaries and employee benefits totaled $\$ 14.9$ million for the first six months of 2000. This represented a decrease of $\$ 274,000$, or $1.81 \%$, from salaries and employee benefits of $\$ 15.1$ million for the same period last year. Equipment expense totaled $\$ 2.5$ million for the six months ended June 30, 2000. This represents a decrease of $\$ 144,000$, or $5.47 \%$, over equipment expense of $\$ 2.6$ million for the six months ended June 30, 1999. Occupancy expense totaled $\$ 2.7$ million for the six months ended June 30, 2000. This represents an increase of $\$ 103,000$, or $4.00 \%$, over occupancy expense of $\$ 2.6$ million for the same period last year. Professional expense, which includes legal and accounting expenses totaled $\$ 1.9$ million for the first six months ended June 30, 2000. This represents a decrease of $\$ 1.1$ million, or $38.12 \%$, over professional expense of $\$ 3.0$ million for the six months ended June 30, 1999. Other expense, which includes data processing, supplies, promotional, and other expenses, totaled $\$ 6.2$ million for the first six months ended June 30 , 2000. This represents a decrease of $\$ 1.1$ million, or $14.67 \%$, over other expense of $\$ 7.3$ million for the first six months of 1999. The reduction in other operating expense resulted from economies of scale derived from the merger with Orange National Bancorp.

For the three months ended June 30, 2000, salary expenses totaled $\$ 7.3$ million. This compares with $\$ 7.6$ million for the same period last year, a decrease of $\$ 300,000$, or $3.22 \%$. Equipment expense totaled $\$ 1.2$ million for the three months ended June 30, 2000. This represents a decrease of $\$ 161,000$, or $11.67 \%$, over equipment expense of $\$ 1.4$ million for the three months ended June 30, 1999. Occupancy expense totaled $\$ 1.3$ million for the three months ended June 30,2000 . This represents an increase of $\$ 45,000$, or $3.60 \%$, over occupancy expense of $\$ 1.2$ million for the same period last year. Professional expense, which includes legal and accounting expenses totaled $\$ 739,000$ for the three months ended June 30, 2000. This represents a decrease of $\$ 914,000$, or $55.31 \%$, over professional expense of $\$ 1.7$ million for the three months ended June 30, 1999. Other expense, which includes data processing, supplies, promotional, and other expenses, totaled $\$ 3.3$ million for the three months ended June 30, 2000. This represents a decrease of $\$ 404,000$, or $11.04 \%$, over other expense of $\$ 3.7$ million for the three months ending June 30, 1999. The reduction in other operating expenses resulted from economies of scale derived from the merger with Orange National Bancorp.

The Company maintains an allowance for potential losses on other real estate owned. The allowance is increased by a provision for losses on other real estate owned, and reduced by losses on the sale of other real estate owned charged directly to the allowance. The allowance was established to provide for future losses. For the six months ended June 30, 2000, there was no additional provision made for other real estate owned. At June 30, 2000 the allowance for potential losses on other real estate owned was $\$ 116,000$, or $18.20 \%$, of the $\$ 635,000$ in other real estate owned.

As a percent of average assets, annualized other operating expenses decreased to $2.80 \%$ for the six months ended June 30,2000 , compared to a ratio of $3.39 \%$ for the six months ended June 30, 1999. The decrease in the ratio indicates that the Company is managing a greater level of assets with proportionately lower levels of operating expenses. The Company's efficiency ratio decreased to $50.57 \%$ for the six months ended June 30,2000 , compared to a ratio of $57.90 \%$ for the six months ended June 30 , 1999 . The decrease in the efficiency ratio indicates that the company is allocating a lower percentage of net revenue to operating expenses.

## BALANCE SHEET ANALYSIS

The Company reported total assets of $\$ 2.11$ billion at June 30, 2000. This represented an increase of $\$ 100.1$ million, or $4.98 \%$, over total assets of $\$ 2.01$ billion at December 31, 1999. Gross loans, net of deferred loan fees, totaled $\$ 991.4$ million at June 30, 2000. This represented an increase of $\$ 38.8$ million, or $4.08 \%$, over gross loans of $\$ 952.6$ million at December 31, 1999. Total deposits decreased $\$ 23.3$ million, or $1.55 \%$, to $\$ 1.48$ billion at June 30 , 2000, from $\$ 1.50$ billion at December 31, 1999. Investment Securities and Debt Securities Available-for-Sale totaled $\$ 955.6$ million at June 30, 2000. This represented an increase of $\$ 78.3$ million, or $8.92 \%$, over total investment securities of $\$ 877.3$ million at December 31, 1999. At June 30, 2000, the Company's net unrealized loss on securities available-for-sale totaled \$28.6 million. Accumulated other comprehensive loss totaled $\$ 16.5$ million, and deferred tax assets totaled $\$ 12.1$ million. At December 31, 1999, the Company reported a net unrealized loss on investment securities available for sale of $\$ 28.4$ million, with accumulated other comprehensive loss of $\$ 16.4$ million and deferred taxes of $\$ 12.0$ million. Note 2 of the Notes to the Consolidated Financial Statements in the Company's 1999 Annual Report on Form 10-K discusses current accounting policy as it pertains to recognition of market values for investment securities held as available-for-sale.

Table 4 sets forth investment securities available-for-sale, at June 30, 2000 and December 31, 1999.

Table 5 sets forth the distribution of the loan portfolio by type as of the dates indicated (dollar amounts in thousands):

Table 5 - Distribution of Loan Portfolio by Type

|  | June 30, 20 | December 31, 1999 |
| :---: | :---: | :---: |
| Commercial and Industrial | \$395, 364 | \$392, 094 |
| Real Estate: |  |  |
| Construction | 49,109 | 48,078 |
| Mortgage | 404,672 | 375,387 |
| Consumer | 24,343 | 24,731 |
| Municipal lease finance receivales | 26,004 | 21,268 |
| Agribusiness | 95,382 | 94,560 |
| Gross Loans | \$994, 874 | \$956,118 |
| Less: |  |  |
| Allowance for credit losses | 18,187 | 16,761 |
| Deferred net loan fees | 3,488 | 3,566 |
| Net Loans | \$973, 199 | \$935, 791 |

As set forth in Table 6, non-performing assets (non-accrual loans, loans 90 days or more past due and still accruing interest, restructured loans, and other real estate owned) totaled $\$ 1.5$ million at June 30, 2000. This represented a decrease of $\$ 356,000$, or $18.77 \%$, from non-performing assets of $\$ 1.9$ million at December 31, 1999. As a percent of total assets, non-performing assets were unchanged at $0.09 \%$ on June 30, 2000, and $0.09 \%$ on December 31, 1999.

Although management believes that non-performing assets are generally well secured and that potential losses are reflected in the allowance for credit losses, there can be no assurance that a general deterioration of economic conditions or collateral values would not result in future credit losses.

TABLE 6 - Non-performing Assets (dollar amount in thousands)

June 30, 2000

| Non-accrual loans | \$611 | \$1,191 |
| :---: | :---: | :---: |
| Loans past due 90 days or more and still accruing interest | 411 | 3 |
| Restructured loans | 0 | 0 |
| Other real estate owned (OREO), net | 519 | 703 |
| Total non-performing assets | \$1,541 | \$1,897 |
| Percentage of non-performing assets |  |  |
| to total loans outstanding and OREO | 0.16\% | 0.20\% |
| Percentage of non-performing assets to total assets | 0.07\% | 0.09\% |

The decrease in non-performing assets was primarily the result of a decrease in non-accrual loans and other real estate owned (OREO) which was partially offset by an increase in loans 90 days or more and still accruing interest. Non-accrual loans totaled $\$ 611,000$ at June 30, 2000. This represented a decrease of $\$ 580,000$, or $48.70 \%$, from total non-accrual loans of $\$ 1.2$ million at December 31, 1999.

At June 30, 2000, the majority of non-accrual loans were collateralized by real property. The estimated loan balances to the fair value of related collateral (loan-to-value ratio) for non-accrual loans ranged from approximately $14 \%$ to $93 \%$.

Loans 90 days or more and still accruing interest totaled \$411,000 at June 30, 2000. This represents an increase of $\$ 408,000$ or $136.00 \%$, over loans 90 days or more past due and still accruing interest of $\$ 3$ at December 31, 1999.

Other real estate owned (OREO) totaled \$519,000 at June 30, 2000. This represents a decrease of $\$ 184,000$ or $26.17 \%$, from OREO of $\$ 703,000$ at December 31, 2000.

The Bank has allocated specific reserves to provide for any potential loss on non-performing loans. Management cannot, however, predict the extent to which the current economic environment may persist or worsen or the full impact such environment may have on the Company's loan portfolio.

22

At June 30, 2000, total deposits were $\$ 1.48$ billion. This represented a decrease of $\$ 23.3$ million, or $1.55 \%$, from total deposits of $\$ 1.50$ billion at December 31, 1999. Demand deposits totaled $\$ 624.9$ million at June 30, 2000, representing a decrease of $\$ 24.9$ million, or $3.84 \%$, from total demand deposits of $\$ 649.8$ million at December 31, 1999. The decrease in demand deposits from the year end total reflects normal seasonal fluctuations relating to agricultural and other depositors. Average demand deposits for the first six months of 2000 were $\$ 598.7$ million. This represented an increase of $\$ 18.9$ million, or $3.26 \%$, from average demand deposits of $\$ 579.8$ million for the first six months of 1999. The comparison of average balances for the first six months of 2000 and 1999 is more representative of the Company's growth in deposits as it excludes the seasonal peak in deposits at year end.

Savings deposits totaled $\$ 501.4$ million at June 30, 2000. This represents a decrease of $\$ 19.6$ million, or $3.76 \%$, from savings deposits of $\$ 521.0$ million at December 31, 1999.

Time deposits totaled $\$ 351.5$ million at June 30, 2000. This represented an increase of $\$ 21.2$ million, or $6.42 \%$, over total time deposits of $\$ 330.3$ million at December 31, 1999. Time deposits are not affected by the Company's seasonal fluctuation in demand deposits.

Other borrowed funds totaled $\$ 438.0$ million at June 30, 2000. This represented an increase of $\$ 115.0$ million, or $35.60 \%$ over other borrowed funds of $\$ 323.0$ million at December 31, 1999. The increase in other borrowed funds during the first six months of 2000 was primarily the result of an increase Federal Home Loan Bank borrowing.

## Liquidity

Liquidity risk is the risk to earnings or capital resulting from the Bank's inability to meet its obligations when they come due without incurring unacceptable losses. It includes the ability to manage unplanned changes in funding sources and to recognize or address changes in market conditions that affect the Bank's ability to liquidate assets quickly and with minimum loss of value. Factors considered in liquidity risk management are stability of the deposit base; marketability, maturity, and pledging of investments; and the demand for credit.

In general, liquidity risk is managed daily by controlling the level of Fed funds and the use of funds provided by the cash flow from the investment portfolio. To meet unexpected demands, lines of credit are maintained with correspondent banks, the Federal Home Loan Bank and the Federal Reserve Bank. The sale of investments maturing in the near future can also serve as a contingent source of funds. Increases in deposit rates are considered a last resort as a means of raising funds to increase liquidity.

For the Bank, sources of funds normally include principal payments on loans and investments, other borrowed funds, and growth in deposits. Uses of funds include withdrawal of deposits, interest paid on deposits, increased loan balances, purchase of assets, and other operating expenses.

Net cash provided by operating activities totaled $\$ 28.7$ million for the first six months of 2000, compared to net cash provided by operating activities of $\$ 17.4$ million for the same period last year. The increase was primarily the result of an increase in interest received.

Net cash used by investing activities totaled $\$ 123.3$ million for the first six months of 2000, compared to net cash used for investing activities of $\$ 46.5$ million for the same period last year. The increase in net cash used by investing activities was primarily the result of additional purchases of investment securities. Financing activities provided net cash flows of $\$ 79.6$ million for the six months ended June 30, 2000. This compares to $\$ 8.5$ million in net cash provided by financing activities for the six months ended June 30, 1999. The increase in net cash provided by financing activities was primarily the result of additional short-term borrowings. At June 30, 2000, cash and cash equivalents totaled $\$ 103.4$ million compared to $\$ 154.4$ million at June 30, 1999.

Since the primary sources and uses of funds for the Bank are loans and deposits, the relationship between gross loans and total deposits provides a useful measure of the Bank's liquidity. Typically, the closer the ratio of loans to deposits is to 100\%, the more reliant the Bank is on its loan portfolio to provide for short term liquidity needs. Since repayment of loans tends to be less predictable than the maturity of investments and other liquid resources, the higher the loan to deposit ratio the less liquid are the Bank's assets. For the first six months of 2000, the Bank's average net loan to deposit ratio averaged 64.40\%, compared to an average ratio of $58.14 \%$ for the first six months of 1999.

CVB is a company separate and apart from the Bank that must provide for its own liquidity. Substantially all of CVB's revenues are obtained from dividends declared and paid by the Bank. There are statutory and regulatory provisions that could limit the ability of the Bank to pay dividends to CVB. At June 30, 2000, approximately $\$ 58.7$ million of the Bank's equity was unrestricted and available to be paid as dividends to CVB. Management of CVB believes that such restrictions will not have an impact on the ability of CVB to meet its ongoing cash obligations. As of June 30, 2000, neither the Bank nor CVB had any material commitments for capital expenditures.

Capital Resources
The Company's equity capital was $\$ 153.1$ million at June 30, 2000. The primary source of capital for the Company continues to be the retention of net after tax earnings. The Company's 1999 Annual Report on Form 10-K (Management's Discussion and Analysis and Note 15 of the accompanying financial statements) describes the regulatory capital requirements of the Company and the Bank.

The Bank and the Company are required to meet risk-based capital standards set by their respective regulatory authorities. The risk-based capital standards require the achievement of a minimum ratio of total capital to risk-weighted assets of $8.0 \%$ (of which at least $4.0 \%$ must be Tier 1 capital). In addition, the regulatory authorities require the highest rated institutions to maintain a minimum leverage ratio of $4.0 \%$. At June 30,2000 , the Bank and the company exceeded the minimum risk-based capital ratio and leverage ratio required to be considered "Well Capitalized".

|  | Required Minimum | June 30, 2000 |  | December 31, 1999 |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Capital Ratios | Ratios | Company | Bank | Company | Bank |
| - ------------- |  |  |  |  |  |
| Risk-based capital ratios |  |  |  |  |  |
| Tier I | 4.00\% | 13.10\% | 13.12\% | 12.60\% | 12.33\% |
| Total | 8.00\% | 14.36\% | 14.38\% | 13.86\% | 13.59\% |
| Leverage ratio | 4.00\% | 7.91\% | 7.91\% | 7.73\% | 7.56\% |

## Risk Management

The Company's management has adopted a Risk Management Policy to ensure the proper control and management of all risk factors inherent in the operation of the Company and the Bank. The policy is designed to address specific risk factors defined by federal bank regulators. These risk factors are not mutually exclusive. It is recognized that any product or service offered may expose the Bank to one or more of these risks. The Risk Management Policy identifies the significant risks as: credit risk, interest rate risk, liquidity risk, transaction risk, compliance risk, strategic risk, reputation risk, price risk, and foreign exchange risk.

Year 2000
The financial institutions industry, as with other industries, was faced with year 2000 issues. These issues centered around computer programs that do not recognize a year which begins with "20" instead of "19", or uses only 2 digits for the year.

As of December 31, 1999, all phases of Year 2000 Plan were complete. As of June 30, 2000, the Company experienced no problems with Year 2000 issues. The Company will continue to monitor critical dates throughout the Year 2000. It is not anticipated that there will be any problems from Year 2000 issues.
Item 1 - Legal Proceedings

CVB Financial has received a tentative opinion on the disposition of the MRI Grand Terrace, Inc. ("MRI") litigation from the California Appellate Court indicating that the verdict of the lower court should be reversed and remanded to the lower court for re-trial. At this time, the appellate court is preparing to hear oral arguments before it renders its final decision. Until a decision is final, the funds placed in reserve for this case will not be released. If the case goes to a new trial, final resolution could take several years.
