#### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended June 30, 1997 and 1996

 Summary of Significant Accounting Policies. See Note 1 of the Notes to Consolidated Financial Statements in CVB Financial Corp.'s 1996 Annual Report. Goodwill resulting from purchase accounting treatment of acquired banks is amortized on a straight line basis over 15 years.

On January 1, 1995, the Bank adopted Statement of Financial Accounting Standards ("SFAS") No. 114, "Accounting by Creditors for Impairment of a Loan," as amended by SFAS No. 118, "Accounting by Creditors for Impairment of a Loan -- Income Recognition and Disclosures." The adoption of this statement did not have a material effect on the results of operations or the financial position of the Bank taken as a whole. Impaired loans totaled \$9.9 million at June 30, 1997. Of this total, \$7.1 million, or 71.38%, represented loans that were supported by collateral with a fair market value, net of prior liens, of \$21.1 million. At June 30, 1997, \$2.8 million, or 28.62%, of total impaired loans represented loans for which repayment was projected to come from cash flows.

Impaired loans totaled \$27.5 million at June 30, 1996. Of this total, \$17.1 million, or 62.18%, represented loans that were supported by collateral with a fair market value, net of prior liens, of \$33.9 million. At June 30, 1996, \$10.4 million, or 37.82%, of total impaired loans represented loans for which repayment was projected to come from cash flows. The impairment amount on these loans was \$3.8 million.

- 2. Certain reclassifications have been made in the 1996 financial information to conform to the presentation used in 1997.
- 3. In the ordinary course of business, the Company enters into commitments to extend credit to its customers. These commitments are not reflected in the accompanying consolidated financial statements. As of June 30, 1997, the Company had entered into commitments with certain customers amounting to \$122.4 million compared to \$103.7 million at December 31, 1996. Letters of credit at June 30, 1997 and December 31, 1996, were \$8.8 million and \$8.5 million, respectively.
- 4. The interim consolidated financial statements are unaudited and reflect all adjustments and reclassifications which, in the opinion of management, are necessary for a fair statement of the results of operations and financial condition for the interim period. All adjustments and reclassifications are of a normal and recurring nature. Results for the period ending June 30, 1997, are not necessarily indicative of results which may be expected for any other interim period or for the year as a whole.
- 5. The actual number of shares outstanding at June 30, 1997, was 9,945,781. Earnings per share are calculated on the basis of the weighted average number of shares outstanding during the quarter plus shares issuable upon the assumed exercise of outstanding common stock options. The number of shares used in the calculation of earnings per share was 10,384,610 and 10,370,622 for the six and three month periods ended June 30, 1997 and 10,197,837 and 10,254,892 for the six and three month periods ended June 30, 1996. All 1996 per share information in the financial statements and in management's discussion and analysis has been restated to give retroactive effect to the 10% stock dividend declared on December 18, 1996.
- 6. Supplemental cash flow information. During the six-month period ended June 30, 1997, loans amounting to \$9.9 million were transferred to Other Real Estate Owned ("OREO") as a result of foreclosure on the real properties held as collateral. OREO sold during the six-month period ended June 30, 1997, amounted to \$3.9 million.

# CVB FINANCIAL CORP. AND SUBSIDIARIES MANAGEMENT'S DISCUSSION AND ANALYSIS

Management's discussion and analysis is written to provide greater insight into the results of operations and the financial condition of CVB Financial Corp. and its subsidiaries. For a more complete understanding of CVB Financial Corp. and its operations, reference should be made to the financial statements included in this report and in the Company's 1996 Annual Report on Form 10-K. Certain statements in this Report on Form 10-Q constitute "forward-looking statements" under the Private Securities Litigation Reform Act of 1995 which involve risk and uncertainties. The Company's actual results may differ significantly from the results discussed in such forward-looking statements. Factors that might cause such a difference include but are not limited to economic conditions, competition in the geographic and business areas in which the Company conducts operations, fluctuations in interest rates, credit quality and government regulations. For additional information concerning these factors, see "Item 1. Business - Factors that May Affect Results" contained in the Company's Annual Report on Form 10-K for the year ended December 31, 1996.

Throughout this discussion, "Company" refers to CVB Financial Corp. and its subsidiaries as a consolidated entity. "CVB" refers to CVB Financial Corp. as the unconsolidated parent company, and "Bank" refers to Citizens Business Bank.

#### RESULTS OF OPERATIONS

The Company reported net earnings of \$7.1 million for the six months ended June 30, 1997. This represented an increase of \$1.0 million, or 17.26%, over net earning of \$6.1 million, for the six months ended June 30, 1996. Earnings per share for the six month period increased to \$0.68 per share for 1997, compared to \$0.59 per share for 1996. The annualized return on average assets remained a constant 1.26% for the first half of 1997 and 1996. The annualized return on average equity was 15.45% for the six months ended June 30, 1997, compared to a return on average equity of 14.98%, for the six months ended June 30, 1996.

For the second quarter of 1997, the Company generated net earnings of \$3.7 million. This represented an increase of \$453,000, or 13.73%, over earnings of \$3.3 million, for the second quarter of 1996. Earnings per share increased to \$0.36 per share for the most recent quarter, compared to \$0.32 per share for the second quarter of last year. The annualized return on average assets was 1.31% for the second quarter of 1997, compared to a return of 1.28% for the second quarter of 1996. The annualized return on average equity was 16.37%, for the second quarter of this year, compared to a return of 16.21%, for the same period last year.

Pre-tax operating earnings, which exclude the impact of gains or losses on sale of securities and OREO, the provisions for credit and OREO losses, and the amount received as settlement for litigation, were \$14.2 million for the six months ended June 30, 1997. This represented an increase of \$1.6 million, or 13.01%, compared to operating earnings of \$12.6 million for the first half of 1996. For the second quarter of 1997, pre-tax operating earnings totaled \$7.5 million. This represented an increase of \$791,000, or 11.82%, over pre-tax operating earnings of \$6.7 million for the second quarter of 1996.

#### Net Interest Income/Net Interest Margin

The principal component of the Company's earnings is net interest income, which is the difference between the interest and fees earned on loans and investments and the interest paid on deposits and other borrowed funds. When net interest income is expressed as a percentage of average earning assets, the result is the net interest margin. The net interest spread is the yield on average earning assets minus the average cost of interest-bearing deposits and borrowed funds.

For the six months ended June 30, 1997, net interest income was \$28.5 million. This represented and increase of \$3.2 million, or 12.68%, over net interest income of \$25.3 million for the six months ended June 30, 1996. Despite the increase in net interest income, the net interest margin decreased to 5.90% for the six months ended June 30, 1996. In addition, the net interest spread decreased to 4.63% for the six months ended June 30, 1997, compared to a spread of 4.84% for the six months ended June 30, 1996.

The increase in net interest income for the most recent six months period was the result of an increased volume of average earning assets. Earning assets averaged \$983.4 million for the first six months of 1997. This represented an increase of \$139.8 million, or 16.57%, compared to average earning assets of \$843.7 million for the first six months of 1996. The decrease in the net interest margin was the result of a lower yield on average earning assets. The decrease in the net interest spread resulted as the yield on average earning assets decreased and the cost of interest bearing liabilities increased.

Similarly, net interest income increased for the second quarter of 1997, compared to the second quarter of 1996. For the second quarter of 1997, net interest income totaled \$14.5 million. This represented an increase of \$784,000, or 5.73%, over net interest income of \$13.7 million for the second quarter of 1996. The increase in net interest income for the second quarter of this year also resulted from an increased volume in average earning assets. For the second quarter of 1997, earning assets averaged \$1.0 billion. This represented an increase of \$106.7 million, or 11.86%, over average earning assets of \$899.6 million for the second quarter of 1996. The net interest margin decreased to 5.84% for the second quarter of 1997, compared to a net interest margin of 6.13% for the second quarter of 1996. Again, the decrease in the net interest margin was the result of a lower yield on average earning assets. The net interest spread decreased to 4.54% for the second quarter of 1997, compared to a spread of 4.96% for the second quarter of 1996.

The Company reported total interest income of \$40.4 million for the six months ended June 30, 1997. This represented an increase of \$4.9 million, or 13.68%, over total interest income of \$35.5 million for the six months ended June 30, 1996. The increase reflected the greater volume of earning assets noted above. The yield on average total earning assets decreased to 8.31% for the six months ended June 30, 1997, from a yield of 8.47% for the six months ended June 30, 1996.

The decrease in the yield on average earning assets resulted from lower yields on average loans, and a greater concentration of earning assets as investments as opposed to loans. The yield on average loans decreased to 9.73% for the six months ended June 30, 1997, from a yield of 9.86% for the first six months of 1996. The 13 basis point decrease in average loan yields primarily reflected increased price competition for loans. Loans typically generate higher yields than investments. Accordingly, as the percent of earning assets allocated to loans increases relative to investments, the greater the potential yield on total earning assets. For the six months ended June 30, 1997, average loans represented 58.89% of average earning assets, compared to 63.06% for the six months ended June 30, 1996.

Similar trends were evident when comparing the second quarter of 1997 with the second quarter of 1996. Total interest income was \$1.7 million, or 8.97%greater for the second quarter of 1997 compared to the second quarter of 1996. The yield on average loans decreased to 9.83% for the second quarter of 1997, compared to a 9.87% yield of the second quarter of 1996. Average loans as a percent of average earning assets decreased to 57.34% for the three months ended June 30, 1997, compared to 62.28% for the same period last year.

Total interest expense was \$11.9 million for the six months ended June 30, 1997. This represented an increase of \$1.6 million, or 16.14%, over total interest expense of \$10.2 million for the six months ended June 30, 1996. The increase reflected the increased volume of interest paying liabilities. Average interest bearing deposits were \$565.6 million for the first six months of 1997. This represented an increase of \$51.7 million, or 10.05%, from total interest bearing deposits of \$514.0 million for the first six months of 1996. Other borrowed funds averaged \$78.4 million for the six months ended June 30, 1997. This represented an increase of \$29.0 million, or 58.74%, over average other borrowed funds of \$49.4 million for the six months ended June 30, 1996. The increase in other borrowed funds reflected greater reliance on funds borrowed from the Federal Home Loan Bank to fund increases in earning assets.

The cost of average interest bearing liabilities was 3.68% for the first six months of 1997, compared to an average cost of 3.63%, for the same period last year. The increase in the cost of interest bearing liabilities was the result of an increase in the cost of other borrowed funds. The cost of interest bearing deposits decreased to 3.43% for the first half of this year, compared to a cost of 3.46% for the same period last year. The cost of other borrowed funds increased to 5.49% for the six months ended June 30, 1997, compared to a cost of 5.32% for the six months ended June 30, 1996.

Table 1 shows the average balances of assets, liabilities, and stockholders' equity and the related interest income, expense, and rates for the six month periods ended June 30, 1997, and 1996. Rates for tax-preferenced investments are shown on a taxable equivalent basis using a 34.0% tax rate. Table 2 summarizes the changes in interest income and interest expense based on changes in average asset and liability balances (volume) and changes in average rates (rate). For each category of earning assets and interest-bearing liabilities, information is privided with respect to changes attributable to (1) changes in volume (change in volume multiplied by initial rate), (2) changes in rate (change in rate multiplied by initial volume) and (3) changes in rate/volume (change in rate multiplied by change in volume).

	Average	Six-month 1997		Average	1996

(F1) Yields are calculated on a taxable equivalent basis.
(F2) Loan fees are included in total interest income as follows: 1997, \$1,647; 1996, \$1,444.
(F3) Nonperforming loans are included in net loans as follows: 1997, \$7,303; 1996, \$16,037.
(F4) Includes interest-bearing demand and money market accounts.

## Comparison of six-month period ended June 30, 1997 and 1996 Increase (decrease) in interest income or expense due to changes in Rate/ Volume Rate Volume Total

	VOTUIIE	Rale	VOTUIIIe	TULAL
Interest Income: Taxable investment securities Tax-advantaged securities Fed funds sold & interest bearing	740	(10)	(17)	713
deposits with other institutions Loans	• •	(10) (331)	6 (29)	
Total earning assets	'	(147)		4,862
Interest Expense: Savings deposits Time deposits Other borrowings	387 540 769	(9) (96) 44	(11)	
Total interest-bearing liabilities	1,696	(61)	14	1,649
Net Interest Income	\$ 3,303 =======	\$ (86)	\$ (4)	\$ 3,213

Interest rate risk is the risk to earnings from movements in interest rates. Interest rate risk arises from differences between the timing of rate changes and the timing of cash flows (repricing risk); from changing rate relationships among different yield curves affecting bank activities (basis risk); from changing rate relationships across the spectrum of maturities (yield curve risk); and from interest-related options embedded in bank investments (options risk). The Company uses models to measure the probable impact to its net interest income and net interest margin under different interest rate scenarios. The models indicate that the Company's net interest income could decrease slightly if interest rates decrease. The models also indicate that an increase in interest rates would probably have little impact on the Company's net interest income.

#### Credit Loss Experience

The Company maintains an allowance for potential credit losses that is increased by a provision for credit losses charged against operating results. The allowance for credit losses is also increased by recoveries on loans previously charged off, and reduced by actual loan losses charged to the allowance. The provision for credit losses was \$1.1 million for the six months ended June 30, 1997. This represented a decrease of \$588,000, or 35.79% from the provision for credit losses of \$1.6 million for the six months ended June 30, 1996. For the second quarter of 1997, the provision for credit losses was \$275,000. This represented a decrease of \$155,000, or 36.05%, from the provision for credit losses of \$430,000 for the second quarter of 1996.

The allowance for credit losses at June 30, 1997 was \$10.2 million. This represented a decrease of \$1.4 million, or 11.99%, from the allowance for credit losses of \$11.5 million at June 30, 1996. The allowance for credit losses decreased to 1.75% of average gross loans for the first half of 1997, compared to 2.17% of average gross loans for the same period last year. For the six months ended June 30, 1997, loans charged to the allowance for credit losses, net of recoveries ("net loan charge offs") totaled \$3.1 million, compared to net loan charge offs of \$435,000 for the first six months of 1996.

Nonperforming assets, which includes nonaccrual loans, loans past due 90 or more days and still accruing, restructured loans, and other real estate owned, decreased to \$20.1 million at June 30, 1997. This represented a decrease of \$9.6 million, or 32.40%, from nonperforming assets of \$29.8 million at December 31, 1997. Nonperforming loans, which include nonaccrual loans, loans past due 90 or more days and still accruing, and restructured loans were \$9.4 million at June 30, 1997. This represented a decrease of \$14.2 million, or 60.20%, from the level of nonperforming loans at December 31, 1996. Table 6 presents nonperforming assets as of June 30 1997, and December 31, 1996. The Company has adopted the methods prescribed by Statement of Financial Accounting Standards No. 114 for determining the fair value of specific loans for which the eventual collection of all principal and interest is considered impaired.

While management believes that the allowance at June 30, 1997, was adequate to absorb losses from any known or inherent risks in the portfolio, no assurance can be given that economic conditions which adversely affect the Company's service areas or other circumstances will not be reflected in increased provisions or credit losses in the future. Table 3 shows comparative information on net credit losses, provisions for credit losses, and the allowance for credit losses for the periods indicated.

#### Other Operating Income

Other operating income includes revenues earned from sources other than interest income. These sources include: service charges and fees on deposit accounts, service charges and fees from trust services, other fee oriented products and services, gains on sale of securities, gains on the sale of other real estate owned, gross revenue from Community Trust Deed Services, and for the six months ended June 30, 1996, settlement of pending litigation.

Other operating income totaled \$6.9 million for the six months ended June 30, 1997. This represented a decrease of \$900,000, or 11.55%, from other operating income of \$7.8 million for the six months ended June 30, 1996. Included as other operating income for 1996 was a \$2.1 million settlement of litigation paid to the Bank in March of last year. Net of this settlement, other operating income increased \$1.2 million, or 21.07%, for the six months ended June 30, 1997, compared to the same period for 1996.

The increase in other operating income, net of the legal settlement, was primarily the result of fee income generated by the introduction of a trust division in March of 1996. Trust income totaled \$1.6 million for the six months ended June 30, 1997. This represented an increase of \$752,000, or 92.27%, over trust income of \$815,000 for the six months ended June 30, 1996.

Other operating income totaled \$3.6 million for the second quarter of 1997. This represented an increase of \$414,000, or 12.93%, over other operating income of \$3.2 million for the second quarter of 1996.

#### Other Operating Expenses

Other operating expenses totaled \$22.4 million for the six months ended June 30, 1997. This represented an increase of \$1.3 million, or 6.13%, over other operating expenses of \$21.1 million for the six months ended June 30, 1996. For the most part, the increase in operating expenses for the six month periods was a result of the acquisition of Citizens Bank of Pasadena on March 29, 1996. The acquisition resulted in addition of four new banking offices and a full service trust division. For the first six months of 1996, the additional operating expenses resulting from the acquisition are only reflected for the second quarter, as opposed to the entire six month period for 1997. For the second quarter of 1997, other operating expenses totaled \$11.4 million, representing an increase of \$592,000, or 5.47%, over total operating expenses of \$10.8 million for the second quarter of 1996.

The increase in operating expenses was primarily the result of salaries and employee benefits which totaled \$11.1 million for the six months ended June 30, 1997. This represented an increase of \$1.5 million, or 16.07%, over salaries and other employee benefits of \$9.6 million for the six months ended June 30, 1996. Again, the increase in salaries and other employee benefits reflected the acquisition of Citizens Bank of Pasadena in 1996. Salaries and employee benefits for the quarter ended June 30, 1997 totaled \$5.6 million. This represented an increase of \$275,000, or 5.15%, over salaries and other employee benefits of \$5.3 million for the quarter ended June 30, 1996.

The Company maintains an allowance for potential losses on other real estate owned. The allowance is increased by a provision for losses on other real estate owned, and reduced by losses on the sale of other real estate owned charged directly to the allowance. The allowance was established to provide for declining Southern California real estate values over the past several years. For the six months ended June 30, 1997, the provision for other real estate owned was \$1.2 million. This represented a decrease of \$1.5 million, or 56.29%, from a provision of \$2.7 million for the six months ended June 30, 1996. The decrease in the provision for 1997 reflects firmer real estate values for this year.

As a percent of average assets, other operating expenses decreased to 3.99% for the six months ended June 30, 1997, compared to a ratio of 4.39% for the six months ended June 30, 1996. The decrease in the ratio indicates that the Company is managing a greater level of assets with proportionately lower levels of operating expenses. The Company's efficiency ratio decreased to 63.18% for the six months ended June 30, 1997, compared to a ratio of 63.68% for the six months ended June 30, 1996. The decrease in the efficiency ratio indicates that the Company is allocating a lower percentage of net revenue to operating expenses.

# BALANCE SHEET ANALYSIS

The Company reported total assets of \$1.15 billion at June 30, 1997. This represented a decrease of \$7.8 million, or 0.67%, over total assets of \$1.16 billion at December 31, 1996. Gross loans totaled \$580.3 million at June 30, 1997. This represented an decrease of \$8.6 million, or 1.46%, over gross loans of \$588.9 million at December 31, 1996. Total deposits decreased \$27.9 million, or 2.81%, to \$962.7 million at June 30, 1997, from \$990.6 million at December 31, 1996. The Company typically receives seasonal increases in loans and deposits resulting from its agricultural customers at each year end. It is not unusual for the Company's total loans and deposits to be lower at subsequent quarter endings.

Investment Securities and Debt Securities Available-for-Sale

The Company reported total investment securities of \$431.2 million at June 30, 1997. This represented an increase of \$47.1 million, or 12.27%, over total investment securities of \$384.1 million at December 31, 1996.

Table 4 sets forth investment securities held-to-maturity and available-for-sale, at June 30, 1997 and December 31, 1996.

At June 30, 1997, the unrealized losses on securities available for sale totaled \$457,000. The Company recorded an adjustment decreasing equity capital by \$264,000, and an adjustment to deferred taxes of \$194,000. At December 31, 1996, the unrealized losses on securities available for sale totaled \$339,000. The Company recorded an adjustment decreasing equity capital by \$196,000, and an adjustment to deferred taxes of \$144,000. Note 2 of the Notes to the Consolidated Financial Statements in the Company's 1996 Annual Report on Form 10-K discusses in detail the Company's policy for accounting for investment securities.

Deferred net loan fees	3,044	3,279
Net loans	\$570,166	\$576,686
	=======	=======

(F1) Includes \$41.1 million and \$72.0 million of loans for which the Company holds real property as collateral at June 30, 1997 and December 31, 1996, respectively.

As set forth in Table 6, nonperforming assets (nonaccrual loans, loans 90 days or more past due, restructured loans, and other real estate owned) totaled \$20.1 million at June 30, 1997. This represented a decrease of \$9.6 million, or 32.40%, from nonperforming assets of \$29.8 million at December 31, 1996. As a percent of total assets, nonperforming assets decreased to 1.75% at June 30, 1997, from 2.56% at December 31, 1996.

Although management believes that nonperforming assets are generally well secured and that potential losses are reflected in the allowance for credit losses, there can be no assurance that a general deterioration of economic conditions or collateral values would not result in future credit losses.

# Table 6 - Nonperforming Assets

	June 30, 1997	December 31, 1996
Nonaccrual loans	\$ 7,303	\$17,564
Loans past due 90 days or more and still accruing interest	55	621
Restructured loans	2,018	5,374
Other real estate owned (OREO), net	10,738	6,196
Total nonperforming assets	\$20,114	\$29,755
Percentage of nonperforming assets	======	======
to total loans outstanding & OREO Percentage of nonperforming	3.40%	5.00%
assets to total assets	1.75%	2.56%

The decrease in nonperforming assets was primarily the result of a decrease in non-accrual loans. Nonaccrual loans totaled \$7.3 million at June 30, 1997. This represented a decrease of \$10.3 million, or 58.42%, from total nonaccrual loans of \$17.6 million at December 31, 1996. In addition, restructured loans decreased to \$2.0 million at June 30, 1997. This represented a decrease of \$3.3 million , or 62.45%, from total restructured loans of \$5.4 million at December 31, 1996. The decrease in nonaccrual and restructured loans is reflected in the increase in loans charged off against the reserve for the six months ended June 30, 1997, and the reduction of the allowance for credit losses at June 30, 1997.

To some extent, the reduction in nonperforming loans is also reflected in the increase in other real estate owned. Other real estate owned totaled \$10.7 million at June 30, 1997. This represented an increase of \$4.5 million, or 73.31%, from total real estate owned of \$6.2 million at December 31, 1996.

The Bank has allocated specific reserves to provide for any potential loss on non-performing loans. Management cannot, however, predict the extent to which the current economic environment may persist or worsen or the full impact such environment may have on the Company's loan portfolio.

#### Deposits and Other Borrowings

At June 30, 1997, total deposits were \$962.7 million. This represented a decrease of \$27.9 million, or 2.81%, from total deposits of \$990.6 million at December 31, 1996. Demand deposits totaled \$386.6 million at June 30, 1997, representing a decrease of \$44.6 million, or 10.33%, from total demand deposits of \$431.2 million at December 31, 1996. The decrease in demand deposits from the year end total reflects normal seasonal fluctuations relating to agricultural depositors. Average demand deposits for the second quarter of 1997 were \$381.3 million. This represented an increase of \$51.9 million, or 15.76%, from average demand deposits of \$329.4 million for the second quarter of 1996. The comparison of average balances for the second quarters of 1997 and 1996, is more representative of the Company's growth in deposits as it excludes the seasonal peak in deposits at year end.

Time deposits totaled \$218.9 million at June 30, 1997. This represented an increase of \$20.7 million, or 10.44%, over total time deposits of \$198.2 million at December 31, 1996. Time deposits are not affected by the Company's seasonal fluctuation in demand deposits.

Other borrowed funds totaled \$83.6 million at June 30, 1997. This represented an increase of \$14.6 million, or 21.10%, over other borrowed funds of \$69.1 million at December 31, 1996. Other borrowed funds include demand notes issued to the U.S. Treasury (relating to customer tax deposits), overnight federal funds purchased, capitalized leases, and secured loans from the Federal Home Loan Bank. Funds obtained from secured loans borrowed from the Federal Home Loan Bank are used to purchase securities at a positive spread. The primary objective of the borrowing is to increase the Company's leverage to generate a greater return on average equity in relationship to the Company's return on average assets. The maturities of the borrowed funds and the resulting investments are structured to reduce the level of the Company's liability sensitivity.

#### Liquidity

The 1996 Annual Report on Form 10-K describes in detail the Company's principal sources of liquidity, liquidity management policy objectives, and methods used to measure liquidity.

There are several accepted methods of measuring liquidity. Since the balance between loans and deposits is integral to liquidity, the Company monitors its loan-to-deposit ratio (gross loans divided by total deposits) as an important part of its liquidity management. In general, the closer this ratio is to 100%, the more reliant an institution becomes on its illiquid loan portfolio to absorb fluctuations in deposits. At June 30, 1997, the Company's loan to deposit ratio was 60.28% compared to a ratio of 59.45% at December 31, 1996.

Another method used to measure liquidity is the liquidity ratio. This ratio is calculated by dividing the difference between short-term liquid assets and marketable securities by deposits and borrowed funds. At June 30, 1997, the liquidity ratio was 46.23%. Conceptually, this shows that the Company had liquid assets or marketable securities equal to 46.23% of its total deposits and borrowed funds at June 30, 1997.

Cash flows provided by operating activities, primarily interest received, totaled \$10.4 million for both the six months ended June 30, 1997 and 1996. Net cash used in investing activities, primarily purchases of investments, was \$45.6 million for the six months ended June 30, 1997, compared to \$26.7 million for the six months ended June 30, 1996. Net cash used for financing activities totaled \$16.6 million for the six months ended June 30, 1996, compared to \$15.8 million for the same period last year. The funds used for both years were primarily the result of decreases in transaction deposits, partially offset by increases in time deposits and other borrowed funds.

# Capital Resources

The Company's equity capital was \$92.8 million at June 30, 1997. The primary source of capital for the Company continues to be the retention of operating earnings. The Company's 1996 Annual Report on Form 10-K (management's discussion and analysis and Note 14 of the Notes to the Consolidated Financial Statements) describes the regulatory capital requirements of the Company and the Bank.

The Bank and the Company are required to meet risk-based capital standards set by the respective regulatory authorities. The risk-based capital standards require the achievement of a minimum ratio of total capital to risk-weighted assets of 8.0% (of which at least 4.0% must be Tier 1 capital). In addition, the regulatory authorities require the highest rated institutions to maintain a minimum leverage ratio of 4.0%. At June 30, 1997, the Bank and the Company exceeded the minimum risk-based capital ratio and leverage ratio required to be considered "Well Capitalized".

Table 7 below presents the Company's and the Bank's risk-based and leverage capital ratios as of June 30, 1997 and December 31, 1996:

Table 7 - Regulatory Capital Ratios

Capital Ratios	Required Minimum Ratios	June 30, Company	1997 Bank	December Company	31, 1996 Bank
Risk-based Capital					
Ratios: Tier I Total Leverage Ratio	4.00% 8.00% 4.00%	11.74% 13.01% 7.19%	11.51% 12.78% 7.04%	11.00% 12.30% 7.20%	10.70% 11.90% 7.00%

On April 16, 1997, the board of directors of the Company authorized the repurchase of shares of its common stock, from time to time, at the discretion of the Company, through open market purchases or in private transactions in an aggregate amount of up to \$9.0 million, or 500,000 shares. As of June 30, 1997, the Company had purchased 84,518 shares for an average price of \$20.328 per share, resulting in a \$1.7 million reduction in the shareholders' equity for the Company.
