### Net Interest Income

Net interest income was \$119.5 million for the second quarter of 2023. This represented a \$6.2 million, or 4.93%, decrease from the first quarter of 2023, and a \$2.4 million, or 1.97%, decrease from the second quarter of 2022. The \$6.2 million quarter-over-quarter decline in net interest income was primarily due to a 0.23% decline in net interest margin. The decline in net interest income compared to the second quarter of 2022 was primarily due to a \$593.1 million decrease in average earning assets, that was partially offset by a six basis point increase in the net interest margin.

### Net Interest Margin

Our tax equivalent net interest margin was 3.22% for the second quarter of 2023, compared to 3.45% for the first quarter of 2023 and 3.16% for the second quarter of 2022. The 23 basis point decrease in our net interest margin compared to the first quarter of 2023, was primarily due to a 34 basis point increase in our cost of funds. Cost of funds increased in part due to a \$555 million increase in short-term borrowings, which had an average cost of 4.90% during the second quarter of 2023. The cost of interest-bearing deposits increased by 49 basis points from the first quarter; however, our total cost of deposits and customer repurchases only increased by 18 basis points, as noninterest-bearing deposits were more than 63% of average deposits during the second quarter of 2023. Our interest-earning asset yield increased by 10 basis points over the prior quarter, primarily due to an 11 basis point increase in loan yields. The six basis point increase in net interest margin, compared to the second quarter of 2022 was the net result of an 81 basis point increase in earning asset yield, offset by a 79 basis point increase in cost of funds. Loan yields grew from 4.31% for the second quarter of 2022 to 5.01% for the second quarter of 2023. Likewise, the yield on investment securities increased by 44 basis points from the prior year quarter. Loan balances grew to 59.41% of earning assets on average for the second quarter of 2023, compared to 55.49% for the second quarter of 2022, while our average balance at the Fed declined from 5.1% of earning assets in the second quarter of 2022 to 2.3% in the second quarter of 2023. Total cost of funds of 0.83% for the second quarter of 2023 increased from 0.04% for the year ago quarter. This 79 basis point increase in cost of funds was the result of an 87 basis point increase in the cost of interest-bearing deposits and an average cost of 4.90% on \$1.53 billion of short-term borrowings for the second quarter of 2023. On average, noninterest-bearing deposits were 63.58% of total deposits during the most recent quarter, compared to 63.65% for the first quarter of 2023 and 62.96% for the second quarter of 2022.

## Earning Assets and Deposits

On average, earning assets grew by \$164.8 million, compared to the first quarter of 2023, while declining by \$593.1 million when compared to the second quarter of 2022. The \$164.8 million quarter-over-quarter increase in earning assets resulted from a \$310.2 million increase in average earning balances due from the Federal Reserve, offset by average investment securities declining by \$73.1 million and average loans decreasing by \$70.9 million. Compared to the second quarter of 2022, average loans increased by \$257.8 million, while the average balance of investment securities declined by \$414.4 million, and the average amount of funds held at the Federal Reserve declined by \$450.1 million. Noninterest-bearing deposits declined on average by \$269.2 million, or 3.33%, from the first quarter of 2023, while interest-bearing deposits and customer repurchase agreements declined on average by \$195.1 million. ## Provision for Credit Losses

The second quarter of 2023 included \$500,000 in provision for credit losses, compared to a \$1.5 million in provision for credit losses in the first quarter of 2023 and \$3.6 million in the second quarter of 2022. The year-to-date provision for credit losses of \$2.0 million was the result of an overall increase in projected loss rates from 0.94% at the end of 2022 to 0.98% at June 30, 2023. The increase in projected loss rates continues to be driven primarily by a deteriorating economic forecast that assumes modest GDP growth through 2024, as well as lower commercial real estate values and an increase in the rate of unemployment.

## Noninterest Income

Noninterest income was \$12.7 million for the second quarter of 2023, compared with \$13.2 million for the first quarter of 2023 and \$14.7 million for the second quarter of 2022. Service charges on deposits decreased by \$506,000, or 9.47% over the first quarter of 2023 and declined by \$495,000, or 9.28% in comparison to the second quarter of 2022. Trust and investment services income grew by \$401,000 compared to the first quarter of 2023 and increased by \$353,000 year-over-year. The second quarter of 2023 included approximately \$800,000 in death benefits that exceeded the asset value of certain BOLI policies, and approximately \$100,000 in swap fees for transitioning swaps out of LIBOR, partially offset by a \$475,000 decrease in CRA investment income due to underlying asset valuation declines. The first quarter of 2023 included approximately \$500,000 in interest rate swap related fees for the conversion of instruments from LIBOR to SOFR and the recapture of a previous impairment charge of \$500,000, as a result of the payoff of a CRA investment that was previously identified as impaired. Compared to the second quarter of 2022, BOLI income increased \$1.5 million due to valuation changes and death benefits that exceeded policy values. Income related to CRA investments declined by \$716,000 compared to the year ago quarter. The second quarter of 2022 also included \$2.7 million in net gains on the sale of properties associated with our banking centers.

## Noninterest Expense

Noninterest expense for the second quarter of 2023 was \$54.0 million, compared to \$54.9 million for the first quarter of 2023 and \$50.9 million for the second quarter of 2022. The second quarter of 2023 included \$400,000 in provision for unfunded loan commitments, compared to \$500,000 in provision for the first quarter of 2023 and no provision for the second quarter of 2022. The \$1.7 million quarter-over-quarter decrease in salaries and employee benefit costs was primarily due to the higher payroll taxes typically incurred in the first quarter of each year. The \$866,000 quarter-over-quarter increase in professional services included increases of \$357,000 in legal expense and \$228,000 in other professional services due to the timing of various projects. The \$3.1 million increase in noninterest expense year-over-year included an increase of \$2.0 million in salaries and employee benefits and a \$785,000 increase in FDIC assessments. As a percentage of average assets, noninterest expense was 1.32% for the second quarter of 2023, compared to 1.36% for the first quarter of 2023 and 1.20% for the second quarter of 2022. The efficiency ratio for the second quarter of 2023 was 40.86%, compared to 39.50% for the first quarter of 2023 and 37.24% for the second quarter of 2022.

## Income Taxes

Our effective tax rate for the quarter ended June 30, 2023 and year-to-date was 28.20%, compared with 28.10% for the second quarter of 2022. Our estimated annual effective tax rate can vary depending upon the level of tax-advantaged income as well as available tax credits.

#### Deposits & Customer Repurchase Agreements

Deposits of \$12.40 billion and customer repurchase agreements of \$452.3 million totaled \$12.85 billion at June 30, 2023. This represented an increase of \$125.7 million in deposits and a decrease of \$37.9 million in customer repurchases compared to March 31, 2023. Deposits and customer repurchase agreements declined by \$551.8 million, or 4.12%, when compared with \$13.40 billion at December 31, 2022. Total deposits and customer repurchase agreements decreased \$1.73 billion, or 11.84% when compared with \$14.58 billion at June 30, 2022. Higher interest rates that have resulted from the Federal Reserve's significant increase in the federal funds rate over the last year have continued to impact deposit levels, including approximately \$550 million of funds on deposit at the end of 2022 that were transferred from the Bank's balance sheet to be invested by Citizens Trust in higher yielding instruments such as treasury notes.

Noninterest-bearing deposits were \$7.88 billion at June 30, 2023, an increase of \$34.5 million, or 0.44%, when compared to \$7.84 billion at March 31, 2023. Noninterest-bearing deposits decreased \$285.6 million, or 3.50% when compared to \$8.16 billion at December 31, 2022, and decreased \$1.0 billion, or 11.29%, when compared to \$8.88 billion at June 30, 2022. At June 30, 2023, noninterest-bearing deposits were 63.55% of total deposits, compared to 63.92% at March 31, 2023, 63.60% at December 31, 2022, and 63.11% at June 30, 2022.

### Short-Term Borrowings

As of June 30, 2023, total short-term borrowings, consisted of \$695 million of one-year advances from the Federal Reserve's Bank Term Funding Program, at a cost of 4.7% and \$800 million of short-term Federal Home Loan Bank advances, at an average cost of approximately 5%.

### Capital

The Company's total equity was \$2.00 billion at June 30, 2023. This represented an overall increase of \$52.9 million from total equity of \$1.95 billion at December 31, 2022. Increases to equity included \$115.0 million in net earnings and a \$9.9 million increase in other comprehensive income. At the end of the second quarter of 2023, we entered into pay-fixed rate swaps to mitigate the risks of rising interest rates. This resulted in a fair value remeasurement of this swap derivative of \$7.8 million at June 30, 2023, resulting in an increase in other comprehensive income. Decreases from December 31, 2022 included \$55.8 million in cash dividends. We engaged in no stock repurchases during the second quarter of 2023, compared to the first quarter of 2023, when we repurchased, under our 10b5-1 stock repurchase plan, 791,800 shares of common stock, at an average repurchase price of \$23.43, totaling \$18.5 million. This 10b5-1 plan expired on March 2, 2023 and no new plan has been put in place since that time. Our tangible book value per share at June 30, 2023 was \$8.74.

Our capital ratios under the revised capital framework referred to as Basel III remain well-above regulatory standards.
